

Sanitaire Bio-MAT™

Reduce Odour Problems and
Blockages in Urinals

This Product Is...

Technical Information

This innovative design incorporates the best available biological dosing of urinal drains, combined with a perfume mat adaptation which delivers the best environmentally sustainable solution whilst also providing maximum waste reduction.

The Bio-Mat™ is a unique innovation that uses the best available biological urinal blocks which have been specially formulated to reduce odour problems and blockages in urinals.

New strains of bacteria have been introduced that increases biological and enzymatic cleaning efficiency to remove fats, uric-scale and solids that build up in urinal traps and pipework; the major causes of odours and blockages.

The perfume mat and block adaptation will deliver the very best value providing a lower cost structure and dramatically reduce waste.

This solution delivers substantial savings on both washroom maintenance and water bills as the need for constant flushing is reduced whilst improving the cleaning regime.

Features and Benefits

- Will work effectively in ALL wall hung urinals
- Assists in preventing blocked traps and pipes
- Supports water saving urinal configurations
- Contains odour neutralising perfume
- Assists in waste reduction
- Reusable & refillable
- Safer to use

Sanitaire Bio-MAT™

Reduce Odour Problems and
Blockages in Urinals

How to use the product

Where this solution is used, do not clean using disinfectant, acid or alkaline cleaners. This device is suitable for ALL wall hung urinals. They should not be used in stainless troughs as masking mats and the biological dosing is not as effective as Bio-Screen™ block holders

- WALL Manual Flush: place over the waste drain opening
- WALL Sensor Flush: place over the waste drain opening
- WALL Waterless: place over the waste drain opening

Case Study

Shopping Centre Victoria:

Biological cleaning regime in place

- Thirteen wall hung Caroma, sensor flush
- BioMAT™ placed in each urinal
- No odour issues
- No pipe blockages
- Reduction in waste
- Quantifiable reduction in flush-water usage
